CONTENTS

Dundee Meeting

Demonstrations

Use of a biasing torque, high inertia mechanical filter, and automatic readout system for human ankle jerk measurements
E.G. Walsh and G.W. Wright 2

Digital colour image display and capture for computer-assisted learning programmes on the Apple Macintosh computer
J.F. Aiton, C.G. Ingram and J.J. O'Connor 3

Does a stretch reflex contribute to the excitations which follow inhibitory jaw reflexes in man?
Stella Mitchell, C.H. Lloyd and S.W. Cadden 4

Computer-based reconstruction of the innervation to the maxillary teeth and air sinus (lateral nasal recess) in the ferret
A.G. Mason and G.S. McKay 5

A means of standardizing the application of electrical stimuli to intra-oral structures during studies of jaw reflexes in man
J.P. Newton, K.C. Sturrock, A.M. Munro and S.W. Cadden 5

Communications

(Na–K–Cl) co-transport in intact villus tips and crypt units from rat duodenum
C.M. McNicholas, C.D.A. Brown and L.A. Turnberg 6

K–Cl co-transport in erythrocytes from the river lamprey (*Lampetra fluviatilis*)
Kiaran Kirk 7

Inhibition of the *y*+ amino acid transporter in human red cells by Na^+ and harmaline
Catherine M. Harvey, Daron A. Fincham and James D. Young 8

Kinetics of glutamine transport in sarcolemmal vesicles isolated from human skeletal muscle
A. Ahmed 9

Characteristics of L-glutamine efflux from incubated rat soleus muscle
N.M. Willhoft and M.J. Rennie 10

Characteristics of glutamine transport in primary tissue culture of rat skeletal muscle cells
L. Tadros and M.J. Rennie 11

Taurine uptake in perfused rat skeletal muscle is mediated by a low capacity, high affinity transport system; *in vitro*
H.S. Hundal and P.W. Watt 12

Modulation of amino acid uptake in *Xenopus* oocytes in relation to environmental amino acid availability
Surinder Kaur, Bryan Mackenzie and Peter M. Taylor 13

Expression of rat liver glutamine transporters in *Xenopus* oocytes
Bryan Mackenzie and Peter M. Taylor 14

Characteristics of tracheal epithelium isolated from fetal and adult sheep: apical and basolateral membrane conductances
M. Acevedo, R.E. Olver and M.R. Ward 15

Cyclic AMP-regulated Na^+ conductance in the apical membrane of fetal sheep alveolar type II cells
P.A. Butcher, A.M. Shaw, L.W. Steele, M.R. Ward and R.E. Olver 16

Effect of vibration or 'Jendrassik manoeuvre' on integrated rectified electromyogram (IREMG) and tension during fatigue of a sustained maximal voluntary contraction (MVC) of adductor pollicis (ADP) in man
J.M.H. Hain and G.C. Leslie 17

The effect of work load on the modulation of the soleus H reflex during cycling in man
S. Chauhan and N.J. Part 18

Model of an interference electromyogram containing an inhibitory reflex
B. Matthews, S.W. Cadden and R. Yemm 19

Monosynaptic EPSPs elicited by trigeminal spindle afferents in trigeminal motoneurones of anaesthetized rats
Paul Grimwood and Kwabena Appenteng 20

Conduction velocity and bag_1 influence on gastrocnemius muscle spindle afferents in the anaesthetized cat
A. Taylor, J.F. Rodgers, A.J. Fowle and R. Durbaba 21

The value of dynamic index in assessing muscle spindle afferent properties in the anaesthetized cat
J.F. Rodgers, A. Taylor, R. Durbaba and A.J. Fowle. 22

Factors influencing magnetic coil excitation of isolated amphibian, cat and primate nerves immersed in a human brain-shaped volume conductor
V.E. Amassian, L. Eberle, P.J. Maccabee and R.Q. Cracco 23

Corticotrophin-releasing hormone-like immunoreactive neurones in the rat cerebral cortex
P.R. Lowenstein, A.F. Shering, J.L. James, P.J. Lowry, E.A. Linton and M.G. Castro 24

Immunocytochemical evidence for a catecholaminergic innervation of post-synaptic dorsal column neurons in the cat
C.A. Doyle and D.J. Maxwell 25

Serial EM reconstructions of individual boutons forming synaptic contacts within the rat V motor nucleus
Sikha Saha, Kwabena Appenteng and Trevor F.C. Batten 26

Intrinsic organization of the ferret primary auditory cortex
M.N. Wallace and S. Bajwa 27

Long-term enhancement *in vitro* appears extracellularly as apparent long-term depression via depolarization masking in kitten area 17
T.P. Hicks and K.-I. Ito 28

^{65}Zn efflux from brain in the anaesthetized rat
P.A. Franklin and R.G.L. Pullen 29

Zinc uptake by human fibroblasts: evidence for a potassium-mediated process
M.L. Ackland and H.J. McArdle. 30

Poly-L-lysine-induced apical membrane permeability associated with increased transepithelial conductance in cultured epithelial cell (MDCK) monolayers
G.T.A. McEwan, B.H. Hirst and N.L. Simmons 31

Transepithelial transport of vinblastine by cultured canine renal epithelia (MDCK)
Janice Hunter, B.H. Hirst and N.L. Simmons 32

A kinetic analysis of the inhibition by taurochenodeoxycholic acid for glycocholic acid transport in placental basal membrane vesicles
N. Eleno and C.A.R. Boyd 33

Cross-inhibition between bile acids for their transport across basal plasma membrane of human term trophoblast
P. Bravo, M.Y. El-Mir, M.A. Serrano and J.J.G. Marin 34

Sub-cellular photon correlation spectroscopy of isolated rat pancreatic acinar cells
E.K. Matthews 35

Of the two outward K^+-currents, $i_K(Ca)$ and $i_K(V)$, in isolated bovine ciliary epithelial cells, only $i_K(Ca)$ will contribute to ion transport
T.J.C. Jacob 36

Properties of a sustained Ca^{2+} independent K^+ current of rat hippocampal neurones *in vitro*
A. Nistri and E. Cherubini 37

Properties of the transient outward K^+ current in cultured GH_3 rat pituitary cells
Brian Robertson 38

The effect of phosphatase inhibitors on calcium channel currents in cultured rat dorsal root ganglion neurones
Annette C. Dolphin 39

Characterization of L- and N-type calcium channels in cultured SH-SY5Y human neuroblastoma cells *in vitro*: calcium imaging and single channel recording
C. Hammond, G. Henderson, W.T. Mason and A.J. Morton 40

Directional growth of cultured rat hippocampal neurones in electric fields
A.M. Rajnicek, N.A.R. Gow and C.D. McCaig 41

Neurotransmitters, second messengers and protein kinase C may underlie orientation of cultured frog nerves in an applied electric field
T. Ahmed, L. Erskine, D.A. Shewan, R. Stewart and C.D. McCaig 42

Selection of pathways by regenerating axons in the transected spinal cord of the goldfish
H. Al-Goshae and S.M. Bunt 43

Uptake of myo-inositol by pre-implantation mouse embryos
M.T. Kane, M.L. Norris and R.A.P. Harrison 44

The influence of n-alkanols and various intravenous general anaesthetics on a whole body withdrawal response of *Physa*
R.M. Barron, J.R. Elliott, A. Hollowbread and J.J. Lambert 45

NMDA antagonist properties of drugs that affect high pressure neurological syndrome investigated in the rat hippocampal slice
M.A. Shuker, F. Bowser-Riley and S.N. Davies 46

Evidence that hypertonic solutions increase quantal size at isolated frog neuromuscular junctions by activating protein kinase A
William Van der Kloot and Dimitrie D. Branisteanu 47

Increased protein synthetic rates in muscle of *mdx* mouse
O.E. Rooyackers and K. Smith 48

The effect of temperature acclimation on cardiac pacemaker activity of the carp (*Cyprinus carpio*) heart measured *in vitro*
P.W. Watt, T. Baird, N.J. Wood and A.A. Harper 49

Intracellular alkalinization increases contraction in isolated rat uterus
Richard C. Heaton and Susan Wray 50

An estimate of the permeability ratios of Na, K and Cl in rat femoral arterial smooth muscle measured *in vitro*
A.R. Chipperfield, J.P.L. Davis and A.A. Harper 51

Gastric emptying of glucose, glucose polymer and rice starch solutions in man
G.E. Vist, J.B. Leiper and R.J. Maughan 52

Absorption of water and solute from glucose-electrolyte solutions in the intact human jejunum
J.B. Leiper, C.S. Primrose and R.J. Maughan 53

Impaired renal excretion of sodium in the Brattleboro (DI) rat: fact or artifact?
W.J. Burgess, I. Abu Amarah and R.J. Balment 54

Renal functional responses to somatic afferent nerve stimulation in hypertensive rats following vagotomy
G. Davis and E.J. Johns 55

Dietary modulation of atrial natriuretic peptide receptors in liver plasma membranes isolated from *Dahl* salt-sensitive rats
Shirley McCartney, G. Cramb and J.F. Aiton 56

Na-dependent taurine uptake in isolated bovine cardiac sarcolemmal vesicles
M.S. Suleiman and R.A. Chapman 57

Zinc uptake by microvillar vesicles isolated from human term placenta
N. Aslam and H.J. McArdle 57

Effect of anaesthetics on central postsynaptic receptor channels expressed in *Xenopus* oocytes
C.J. Shelton, M.G. Doyle, E.C.D. Gibson, N. Inman, D.J. Price, J.R.A. Wooltorton, D.M. Zhao, S. Daniels and E.B. Smith 57

Cambridge Meeting

Demonstrations

A new method to identify and study surface interactions taking place on mouse Peyer's patch M cells
P.S. James, T.C. Savidge and M.W. Smith 60

Quantitative immunogold cytochemical determination of chick enterocyte calbindin concentrations
J.C.Y. Wu, M.W. Smith and F.B.P. Wooding 61

Analysis of cytosolic free calcium records from lectin-activated rat T-lymphocytes and human lymphoma cells in the fluorescence-activated cell sorter
R.T. Tregear, N.G.A. Miller, D.C. Skinner and W.J. Coadwell 62

Simultaneous patch-clamp and photometric fluorescence ratio measurements of optical probes for ions using a computer-based data acquisition system, PhoCal
B. Somasundaram, J. Hoyland, J. Dempster, J. Riley and W.T. Mason 63

Dynamic four-wavelength video imaging of intracellular pH and calcium homeostasis in cultured bovine lactotrophs
R. Zorec, J. Hoyland, G. Relf, R. Bunting and W.T. Mason 64

Use of ^{3}H-noradrenaline (NA) for detection of low levels of NA in samples obtained by microdialysis from the preoptic area (POA) of the anaesthetized rat
C. Fernandez-Galaz, A. Herbison and R.G. Dyer 65

Microdialysis sampling of *in vivo* neurotransmitter release in the brain of the conscious sheep: measurement of acetylcholine, amino acid and monoamine concentrations by high performance liquid chromatography (HPLC)
K.M. Kendrick and M.R. Hinton 66

A mathematical model for the interaction between luteinizing hormone-releasing hormone (LHRH), GABA and noradrenaline cells in the rat
D. Brown, A.E. Herbison, G. Leng and R.W. Marrs 67

Estimation of stimulus spread from stimulating electrodes in the CNS of the anaesthetized rat
R.E.J. Dyball and G. Leng 68

The effects of recombinantly-derived insulin-like growth factor-I and insulin-like growth factor-II on mammary vasodilatation in the goat
I.R. Fleet, A. Davis, M. Richardson and R.B. Heap 69

A microprocessor-based digital timer for controlling physiological experiments
H.R. Matthews 70

An ion-selective membrane to teach the resting properties of excitable cells
H.R. Matthews and D.J. Tolhurst 71

Patch-clamp whole-cell pulse protocol measurements using a microcomputer
Peter M. Smith 72

Improved recording characteristics using silicone-coated multi-barrel micropipettes
G. Scott and R. Mason 73

A new micromanipulator and tissue support apparatus for electrophysiological recording
David G. Owen and Brian Robertson 74

Simultaneous measurement of tension, intracellular calcium ($[Ca]_i$) and membrane potential in stretched, single guinea-pig ventricular myocytes
J.-Y. Le Guennec, E. White, F. Gannier and D. Garnier 75

Continuous acquisition and real-time analysis of EEG, ECG and respiratory data in the anaesthetized human
J.R. Sneyd, C.J.D. Pomfrett and T.E.J. Healy 76

A method for monitoring movements without mechanical contact
J.H. Park and W. Winlow 77

A movable microwire technique for chronic recording from the brain-stem
D. Banks, M. Kuriakose and B. Matthews 78

Communications

Opioids mediate the inhibitory actions of progesterone on luteinizing hormone (LH) secretion in the ewe by augmenting the release of GABA in the preoptic area
J.E. Robinson and K.M. Kendrick 79

***Fos* immunoreactivity is induced in cells throughout the lamina terminalis following intravenous hypertonic saline infusions in rats**
R.J. Bicknell, B.J. Oldfield, R.M. McAllen, R.S. Weisinger and M.J. McKinley 80

Oxytocin (OXT) secretion evoked by stimulation of the AV3V region and its modulation by opioids in urethane-anaesthetized pregnant rats
A.J. Douglas, J.A. Russell and P.M. Bull 81

Corticotrophin releasing factor inactivates early glucocorticoid feedback in rat adenohypophysis *in vitro*
M.J. Shipston and F.A. Antoni 82

Effects of endothelin (ET) on neurones in the anteroventral third ventricle region and supra-optic nucleus of rat hypothalamic slice preparations
H. Yamashita, S. Yamamoto and K. Inenaga 83

Suppression of lordosis reflex in the female rat by electrical stimulation of the forebrain and ventral mid-brain
Yasuo Sakuma 84

The effects of hypophysectomy on glucose metabolism in the sheep fetus
Abigail L. Fowden and Marian Silver 85

Effect of glucocorticoids on gastric prochymosin in the fetal pig
P. Sangild, A.L. Fowden and M. Silver 86

Thyroid hormone uptake at the blood face of the isolated perfused sheep choroid plexus
J.E. Preston and M.B. Segal 87

Acute and chronic effects of potassium on aldosterone release in rats fed with different amounts of sodium
W.J. Lee, E.K. Yang, J.S. Park, Y.Y. Park and D.K. Ahn 88

The role of angiotensin II in mediating the renal actions of noradrenaline
H.M. Yang, T.E. Lohmeier, S.D. Kivlighn, Y.K. Min and D.W. Shim 89

Rat kidney expresses GC-A, not GC-B receptors for natriuretic peptides
J. Brown and Z. Zuo 90

Binding of rat brain natriuretic peptide (BNP) to atrial natriuretic peptide (ANP) receptors in rat kidney
J. Brown and B. Cheung 91

Effects of atrial natriuretic peptide and angiotensin II on salt and water excretion by the perfused rainbow trout kidney
J.B. Dunne and J.C. Rankin 92

Human epididymal cells respond to adrenaline by increase in short-circuit current and whole-cell chloride current
P.Y.D. Wong, S.J. Huang, A.Y.H. Leung, W.O. Fu, Y.W. Chung and P.S.F. Chan 93

A method for studying apical anion conductance in cultured rat epididymal cells using the short-circuit current technique
A.Y.H. Leung and P.Y.D. Wong 94

Polyamine transporters in cultured porcine aortic endothelial cells
R.G. Bogle, D.M.L. Morgan, J.D. Pearson and G.E. Mann 95

Polarized efflux of bis-carboxyethyl-carboxyfluorescein (BCECF) from cultured renal (MDCK) and colonic (Caco-2) epithelial cell monolayers
Georgina K. Collington, Nicholas L. Simmons, and Barry H. Hirst 96

Electrical properties of primary monolayer cultures of human endometrial glandular epithelial cells
C. Jane Matthews, G.T.A. McEwan, C.P.F. Redfern, E.J. Thomas and B.H. Hirst 97

Rate and mechanism of ^{59}Fe transport into brain and other tissues of the anaesthetized rat and mouse
F. Ueda and M.W.B. Bradbury 98

Network simulation of epithelial transport
Yusuke Imai, Manabu Miyamoto, Takashi Nakahari, Hideyo Yoshida and Yoshiro Sohma 99

Monitoring of intracellular Na by double-quantum filter ^{23}Na NMR spectroscopy
Y. Seo and M. Murakami 100

Intracellular pH clamp experiments on single mouse lacrimal acinar cells
A. Tepikin and T. Sasaki 101

Absence of volume regulation in acinar cells of the isolated, perfused rat mandibular gland
M.C. Steward and J.B. Larcombe-McDouall 102

Handling of NH_4^+, K^+ and Na^+ by the perfused mandibular salivary gland during perfusion with NH_4Cl
M. Murakami and Y. Seo 103

Effects of Ni^{2+} on Ca^{2+}-activated $K^+$and Cl^- currents in rat mandibular acinar cells
M. Wakui, E. Sawada, H. Hayashi and A. Nishiyama 104

Arachidonic acid inhibits volume-sensitive Cl currents in a human intestinal epithelial cell line
Machiko Kubo and Yasunobu Okada 105

Fluid secretory responses to *Escherichia coli Sta* enterotoxin *in vivo* by ilea and jejuna from starved and chronically undernourished rats
Helen Nzegwu and R.J. Levin 106

Electrogenic secretion in rat intestine *in vitro* activated by *E. coli Sta* is not mediated by local release of 5-hydroxytryptamine
Vivien Rolfe, R.J. Levin and A. Young 107

Evidence of β-agonist and cAMP-stimulated chloride conductance in toad skin epithelium being localized to the mitochondria-rich cells
Niels J. Willumsen, Lars O. Vestergaard and E. Hviid Larsen 108

Effects of lowered cytoplasmic calcium concentration and light on the responses of rod photoreceptors isolated from the retina of the tiger salamander
H.R. Matthews 109

Effects of 4-aminopyridine on the responses to small decreases in light intensity in photoreceptors in the isolated retina of the drone honeybee
A.M. Vallet, J.A. Coles and J.C. Eilbeck 110

Calcium current of isolated bipolar cells of the cat retina
P. Villa and A. Kaneko 111

Transducer currents in outer hair cells in cochlear cultures of neonatal mice
C.J. Kros, A. Rüsch, G.P. Richardson and I.J. Russell 112

Binding of a polyclonal antibody raised against an amiloride-sensitive Na^+ channel to guinea-pig cochlear hair cells *in vitro* is reduced by drugs known to affect mechanoelectrical transduction
C.M. Hackney, D.N. Furness and D.J. Benos 113

The effect of saline and histamine on blood flux in the human nasal septal mucosa as measured by a laser Doppler flowmeter
M.A. Birchall, N.B. Pride and R.C. Schroter 114

Epithelium-derived prostanoids inhibit the release of endogenous noradrenaline from rat isolated trachea
G. Brunn, C. Langer, J. Bähring, I. Wessler and K. Racké 115

Bradykinin-induced increases in albumin output and lysozyme secretion are reduced by indomethacin in the ferret trachea *in vivo*
U.M. Wells, E. Yurdakos, S. Kitano and S. Webber 116

The selective nature of airway hyperreactivity
J. Morley, K. Hoshiko, I.D. Chapman and L. Mazzoni 117

Interaction of acute hypoxic ventilatory response (HVR) and the respiratory stimulant S9581
Denise Bee 118

Ventilatory response to sustained hypoxia in carotid body-resected humans
Y. Honda, M. Tanaka and H. Kimura 119

Modulation by theophylline of the ventilatory response to moderate hypoxia in conscious, newborn rats
B.K. Elnazir, P. Kumar and Janice M. Marshall 120

Peripheral chemoreceptor modulation of respiration during alternating hypoxia in conscious, newborn rats
T. Thomas and P. Kumar 121

Improved assessment of CO_2 analyser transport delays
C.B. Wolff and A.J. Paddon 122

The influence of brisk walking on endurance fitness in previously sedentary, middle-aged men
D.J. Stensel, A.E. Hardman, K. Brooke-Wavell, P.R.M. Jones and N.G. Norgan 123

Body core cooling by gastric lavage in man
F.J. Imms and K. Tadesse 124

Identification of a histidine residue in the rat lymphocyte channel (RGK5) that is involved in current inactivation
M.P. Kavanaugh, A.E. Busch, R.S. Hurst, J.P. Adelman and R.A. North 125

A pH-sensitive K^+ conductance in the egg membrane of the teleost fish *Oryzias latipes* disappears after fertilization
D.J. Webb 126

ATP activates a Ca^{2+}-dependent Cl^- current via a novel type of P_2-receptor in the FRTL-5 rat thyroid cell line
S.C. Martin 127

Acetylcholine and caffeine evoke repetitive transient Ca^{2+}-activated K^+ and Cl^- currents in mouse submandibular cells
P.M. Smith and D.V. Gallacher 128

Activation of non-selective cation channels by physiological cholecystokinin concentrations in mouse pancreatic acinar cells
P. Thorn 129

An ATP-sensitive K^+ channel in the membrane of fused giant mitoplasts
I. Inoue, H. Nagase, K. Kishi and T. Higuti 130

Transient outward K^+ currents are expressed with high probability in human uterine fibroid cells in culture in comparison to normal myometrial cells
S.D. Erulkar, J. Ludmir, B. Ger and R. DePino 131

Simultaneous measurement of $[Ca^{2+}]_i$ and K(ATP) channel activity in single dissociated mouse pancreatic B-cells
A. Nadal, D. Contreras, B. Soria and M. Valdeolmillos 132

Second messenger regulation of the slowly activating, voltage-dependent potassium current (I_{sK}) in *Xenopus* oocytes
A.E. Busch, M.P. Kavanaugh, J.P. Adelman and R.A. North 133

Simultaneous Fura-2 and ion-sensitive microelectrode measurement of free calcium ion changes in voltage-clamped *Helix aspersa* neurones
Roger C. Thomas and Helen J. Kennedy 134

A sodium- and voltage-dependent potassium current in spinal neurons of the *Xenopus* embryo
N. Dale 135

Actions of the convulsant barbiturate 5-(2-cyclohexylidine-ethyl)-5-ethyl barbituric acid (CHEB) on dissociated mouse sensory neurons
Rosalyn J. Pearce and Michael R. Duchen 136

Unimpaired Ca^{2+} homeostasis is found in dystrophin-lacking smooth muscle from *mdx* mice
Benoit Boland, Bernard Himpens, Jean-Marie Gillis and Rik Casteels 137

Nucleo–cytoplasmic Ca^{2+} gradients at rest and during stimulation in DDT_1MF_2 smooth muscle cells
B. Himpens, G. Droogmans, H. De Smedt and R. Casteels 138

G protein regulation of prostaglandin production in cultured guinea-pig myometrium
A.Y. Khouja and C.T. Jones 139

Contribution of Ca^{2+}-induced Ca^{2+} release to the depolarization-induced Ca^{2+} transients in smooth muscle cells from the guinea-pig urinary bladder
V.Ya. Ganitkevich and G. Isenberg 140

HCO_3^--dependence of recovery from intracellular acidosis in the perfused ferret heart during Na^+–H^+ antiport inhibition
A.A. Grace, H.L. Kirschenlohr, G.A. Smith, J.C. Metcalfe, P.L. Weissberg and J.I. Vandenberg 141

α-Adrenergic receptors mediate inhibition of Na^+–HCO_3^- symport in the guinea-pig and rabbit ventricular myocyte
Dominique Lagadic-Gossmann, P. Richmond and R.D. Vaughan-Jones 142

The positive inotropic effect of α_1-adrenoceptor activation is dependent upon action potential prolongation in rat cardiac myocytes
R.A. Bouchard and D. Fedida 143

Rapid effects of photo-released guanosine nucleotides on L-type Ca^{2+} and Ba^{2+} currents in guinea-pig cardiac ventricular myocytes
R.Z. Kozlowski, L.J. Goodstadt, V.W. Twist and T. Powell 144

Changes in T-type and L-type calcium current densities in newborn rat cardiomyocytes in culture
E. Nalivaiko, N. Pronchuk and V. Sagach 145

Regenerative Ca^{2+} release in guinea-pig atrial myocytes
G. Callewaert, P. Lipp, K.R. Sipido, L. Pott and E. Carmeliet 146

The effect of inorganic phosphate on the SR of isolated saponin-treated rat heart
G.L. Smith, D.S. Steele and C.A. Crichton 147

The effect of thapsigargin on the calcium transient and twitch of single myocytes isolated from rat heart
S.C. O'Neill, C. Lamont, N. Negretti and D.A. Eisner 148

Taurine modulates the inward background current induced by isoprenaline in isolated ventricular cells of the rabbit
C.H. Leem, I.S. So, W.K. Ho and Y.E. Earm 149

Cl^--sensitive component of Ca^{2+}-activated tail current in rabbit atrial myocytes
C.O. Park, W.K. Ho and Y.E. Earm 150

Cyclic GMP potentiates β-adrenergic activation of Cl^- currents in guinea-pig ventricular cells
K. Ono, F.M. Tareen, A. Yoshida, A. Noma and W. Trautwein 151

Persistent activation of a chloride current in rabbit cardiac myocytes
D. Fedida, R.B. Clark and W.R. Giles 152

Intra-pipette GTP prevents the rapid rundown of β-adrenoceptor-mediated activation of Cl current in isolated guinea-pig ventricular myocytes
Minoru Horie, Tzyh-Chang Hwang and David C. Gadsby 153

Two ionic conductances activated by extracellularly applied ATP in guinea-pig atrial cell
Hiroshi Matsuura and Tsuguhisa Ehara 154

Reactivation of ATP-sensitive K^+ channel current by pinacidil in guinea-pig ventricular myocytes
M. Hiraoka, Z. Fan, K. Nakayama and T. Sawanobori 155

Voltage-dependent block by internal sodium ions of the cardiac inwardly rectifying K^+ channel
H. Matsuda 156

Interactions between postsynaptic membrane properties and IPSPs in turtle Purkinje cells *in vitro*
Jens Midtgaard 157

Central projections of Aδ nociceptive neurons in the trigeminal ganglion of the crotaline snake, *Trimeresurus flavoviridis*
S. Terashima and Y.-F. Liang 158

Effect of sensory stimuli on synaptic input to an identified interneurone and on feeding behaviour in *Lymnaea stagnalis*
H.A. Whelan and C.R. McCrohan 159

Seasonal variability in brain dopamine and serotonin levels in *Lymnaea stagnalis*?
M.S. Hetherington, J.D. McKenzie and W. Winlow 160

Acetylcholine is the putative transmitter of the slow oscillator modulatory interneurone in the snail feeding system
M. Yeoman and P.R. Benjamin 161

Activity of spinal cord sensory interneurones during two motor patterns in *Xenopus* embryos
S.R. Soffe 162

Neuromuscular gap junctions in the fly eclosion muscle system?
J.A. Miyan and J. Preece 163

A note on dark waves ('wandering clouds') in the skin of *Octopus vulgaris*
A. Packard 164

Relocation of preganglionic vagal motoneurones in the brainstem of the axolotl at metamorphosis
Y.M. Ihmied and E.W. Taylor 165

The application of Eyring–Boltzmann transition rate theory to the study of fast displacement charge movements in the giant axon of *Loligo forbesi*
I.C. Forster and N.G. Greeff 166

Efficiency of electromechanical transduction in the voltage sensor of ion channels; a theoretical study
N.G. Greeff 167

Regulatory effects of intracellularly applied calcium and magnesium ions on ion channel activities in the giant axon of the squid *Darytheutis bleekeri* giant axon
S. Yamagishi, F. Kukita and K. Furuya 168

Blocking of the sodium channel by external Tris in the squid *Dorythentis bleekeri* giant axon
R.D. Keynes, E. Rojas and V. Ceña 169

Voltage-dependent calcium and potassium channels in mouse Schwann cells
T. Amédée, B. Dupouy, E. Ellie and J.D. Vincent 170

Calcium currents in cultured cockroach (*Periplaneta americana*) neurones
M. Amar and Y. Pichon 171

A phorbol ester modulates calcium currents in neurones of *Helix aspersa*
I.C. Gibson and S.D. Logan 172

Effects of arachidonic acid on rubidium uptake in human erythrocytes
J.F. St. J. Dwight and B.M. Hendry 173

The action of maltose on glucose exits in human erythrocytes in the presence of high concentrations of methanol
W.F. Widdas and G.F. Baker 174

Lead transport and binding by human red blood cells at 'physiological' lead levels
T.J.B. Simons 175

Characterization of L-proline transport in erythrocytes of a primitive vertebrate, the Pacific hagfish (*Eptatretus stouti*)
Anthony W.-I. Lo, Catherine M. Harvey, Michael W. Wolowyk and James D. Young 176

Excitatory currents at the rat mossy fibre–granule cell synapse in thin cerebellar slices
R. Angus Silver, Stephen F. Traynelis and Stuart G. Cull-Candy 177

Multiple non-NMDA glutamate receptors in rat cerebellar granule neurones in explant culture
David J.A. Wyllie, Stephen F. Traynelis, and Stuart G. Cull-Candy 178

The effect of hydrostatic pressure on glycine receptors expressed in *Xenopus* oocytes
C.J. Shelton, M. Doyle, S. Daniels and E.B. Smith 179

A possible explanation for the difference between the apparent affinity of agonists for their receptors and the concentrations at which they activate those receptors; studied in tissue sections from the rat heart
A.J. Nimmo, Jill R. Carstairs, Elaine M. Whitaker and J.F.B. Morrison 180

Ca^{2+} channel currents in the dorsal root ganglion cell x neuroblastoma hybrid cell line, ND7-23
H.A. Pearson, E.M. Kobrinsky and A.C. Dolphin 181

Multiple inactivation components of calcium currents in acutely isolated adult rat dorsal raphe cells are revealed by increases in temperature
R.H. McAllister-Williams and J.S. Kelly 182

Glutamate receptor channel activation following fast agonist application to patches from rat hippocampus CA1 and CA3 pyramidal cells
D. Colquhoun, P. Jonas and B. Sakmann 183

Effects of arachidonic acid on glutamate-gated channels in granule cells cultured from rat cerebellum
Barbara A. Miller, Monique Sarantis and David Attwell 184

Effect of calmodulin antagonist on cardiac Na^+–Ca^{2+} exchange current in isolated ventricular cells from guinea-pig
Junko Kimura 185

Voltage dependence of the sodium pump current of isolated rabbit cardiac Purkinje cells in sodium-free, thallium-containing solution
Frieda V. Bielen, H.G. Glitsch and F. Verdonck 186

Functional homologies between the Na–Ca exchange cycle and the Na–K pump cycle in giant excised patches of guinea-pig cardiac sarcolemma
